

Progress Lighting

# Why UPGRADE

- Upgrading throughout with the same collection, including ceiling fans and sconces, incorporate whole-house looks, which provides visual continuity to the design.
- Lighting upgrades can enhance your home by providing a consistent whole-house look, creating focal points in special areas or by defining space without enclosing it.

○ Consider undercabinet lighting in the toe-kick area of kitchen cabinets to provide safe navigation at night.

○ The addition of sconces in a bath will help illuminate the face and make shaving or applying makeup easier.

PROGRESS  
LIGHTING

100 YEARS OF  
PROGRESS

# Why PROGRESS

Progress Lighting is the #1 Decorative Lighting brand among builders and remodelers and continues to be the largest manufacturer of residential lighting in North America, offering more than 5,000 products with something for every application, style and budget.
